ANALISIS PERSEPSI MAHASISWA KEDOKTERAN UMUM UNIVERSITAS JENDERAL SOEDIRMAN TERHADAP PERAN APOTEKER

Yulia Ekawati¹, Nia Kurnia Sholihat², Nialiana Endah Endriastuti³

Latar belakang : Kegiatan *Interprofessional Collaboration* (IPC) antara dokter dan apoteker dapat dipengaruhi oleh persepsi dokter terhadap peran apoteker. Persepsi mahasiswa kedokteran sebagai calon dokter akan berpengaruh terhadap kegiatan IPC pada masa mendatang.

Tujuan : Penelitian ini bertujuan untuk mengetahui persepsi mahasiswa kedokteran umum Universitas Jenderal Soedirman terhadap peran Apoteker, hubungan antara jenis kelamin dengan persepsi dan perbedaan persepsi berdasarkan tingkatan studi.

Metodologi : Penelitian ini merupakan penelitian non-eksperimental dengan desain cross sectional, dilakukan pada bulan Mei-Juni 2021 dengan sampel mahasiswa kedokteran umum Universitas Jenderal Soedirman. Instrumen penelitian ini berupa kuesioner mengenai persepsi mahasiswa kedokteran umum. Teknik sampling yang digunakan dalam penelitian ini yaitu *proportional quota sampling*.

Hasil Penelitian : Sebanyak 209 responden telah mengisi kuesioner. Hasil penelitian menunjukkan sebanyak 72,7% mahasiswa kedokteran umum memiliki persepsi baik terhadap peran apoteker, tidak terdapat hubungan antara jenis kelamin dengan persepsi ($p=0,209$) dan terdapat perbedaan persepsi berdasarkan tingkatan studi ($p=0,001$).

Kesimpulan : Mahasiswa kedokteran umum perlu mempertahankan serta meningkatkan persepsinya terhadap peran Apoteker.

Kata Kunci : Mahasiswa kedokteran, persepsi, peran Apoteker

Abstract

**PERCEPTION ANALYSIS OF GENERAL MEDICINE STUDENT OF
JENDERAL SOEDIRMAN UNIVERSITY ON THE ROLE OF
PHARMACIST**

Yulia Ekawati¹, Nia Kurnia Sholihat², Nialiana Endah Endriastuti³

Background: Interprofessional Collaboration (IPC) activities between doctors and pharmacists can be influenced by doctors' perceptions of the pharmacist's role. The perception of medical students as prospective doctors will affect IPC's activities in the future.

Objective: This study aimed to determine the perception of general medical students at Jenderal Soedirman University on the role of pharmacists, the relationship between gender and perception and differences in perceptions based on study level.

Methods: This research was non-experimental study with a cross sectional design, conducted in May-June 2021 with a sample of general medical students at Jenderal Sudirman University. The instrument of this research was questionnaire regarding the perceptions of general medical students. The sampling technique used in this research is proportional quota sampling.

Result: A total of 209 respondents have filled out the questionnaire. The results showed that 72.7% of general medical students had a good perception of the role of pharmacists, there was no relationship between gender and perception ($p = 0.209$) and there was differences in perceptions based on the level of study ($p = 0.001$).

Conclusion: General medical students needed to maintain and improve their perception of the role of pharmacists

Keywords: Medical student, perception, role of Pharmacist
