

ABSTRAK

HUBUNGAN SOSIAL EKONOMI DAN *ORAL HEALTH BELIEF* DENGAN *ORAL HEALTH RELATED QUALITY OF LIFE* DI DESA KARANGTENGAH, KECAMATAN BATURRADEN, KABUPATEN BANYUMAS

Aprillya Yuniarni

OHRQoL merupakan penilaian multidimensional yang dipengaruhi oleh status kesehatan rongga mulut, karakter demografi, psikososial dan keadaan sosial ekonomi. *Oral health belief* yang diterapkan pada keseharian individu juga dapat mempengaruhi *oral health related quality of life*. Penelitian ini bertujuan untuk mengetahui hubungan antara sosial ekonomi dan *oral health belief* dengan *oral health related quality of life* di Desa Karangtengah, Kecamatan Baturraden, Kabupaten Banyumas. Penelitian ini menggunakan pendekatan *cross sectional*, dengan menggunakan teknik *purposive sampling* untuk pengambilan sampel pada 8046 warga dan didapatkan 106 sampel. Data sosial ekonomi didapatkan dari riwayat pendidikan, pekerjaan dan penghasilan. *Oral health belief* didapatkan dari kuesioner *oral health belief*. OHRQoL dievaluasi menggunakan OHIP-14. Data kemudian dianalisis secara statistik menggunakan *Chi-square* dan *Spearman-rho*. Hasil yang didapatkan sebagian besar warga memiliki sosial ekonomi yang rendah. *Oral health belief* menunjukkan para warga memiliki keyakinan yang rendah. OHRQoL menunjukkan banyak warga yang memiliki OHRQoL yang rendah. Analisis data menunjukkan pekerjaan ($p=0,304$) dan penghasilan ($p=0,100$) tidak memiliki hubungan dengan OHRQoL, tetapi pendidikan ($p=0,004$) dan *oral health belief* ($p=0,020$) memiliki hubungan dengan OHRQoL. Simpulan penelitian ini adalah terdapat hubungan antara sosial ekonomi dan *oral health belief* dengan *oral health related quality of life* di Desa Karangtengah, Kecamatan Baturraden, Kabupaten Banyumas.

Kata Kunci : Sosial ekonomi; *Oral health belief*; *Oral health related quality of life*

ABSTRACT

THE CORRELATION BETWEEN SOCIAL ECONOMIC AND ORAL HEALTH BELIEF WITH ORAL HEALTH RELATED QUALITY OF LIFE AT DESA KARANGTENGAH, KECAMATAN BATURRADEN, KABUPATEN BANYUMAS

Aprillya Yuniarni

OHRQoL is multidimensional tools and can be affected by oral health status, demographic characteristics, psychosocial factors and socioeconomic. Oral health beliefs applied to an individual's daily life can also affect the OHRQoL. This research aims to know the relationship between social economic and oral health belief with oral health related quality of life at Desa Karangtengah, Kecamatan Baturraden, Kabupaten Bayumas. Study conducted by cross sectional design with purposive sampling technique to collect sample from 8046 citizen and it was collect 106 sample. The data of social economic obtained from educational history, occupation and income. The oral health belief data obtained from oral health belief questionnaire. The OHRQoL evaluated using OHIP-14 questionnaire. Then the data were analyzed statistically with Chi Square and Spearman-rho. The result obtained most respondent had low social economic status. Oral health belief showed that respondents has a low score. OHRQoL showed that many respondent has low OHRQoL. Data analysis showed that occupation ($p=0,340$) and income ($p=0,100$) had no relationship with oral health related quality of life but education level ($p=0,004$) and oral health belief ($p=0,020$) had relationship with oral health related quality of life.
