## **ABSTRAK**

Tujuan penelitian ini untuk mengetahui implementasi hukum pelayanan kolaborasi bidan dan dokter dalam pelayanan kebidanan dan kandungan dan pengaruh faktor kedisiplinan, fasilitas dan kerja sama terhadap implementasi hukum pelayanan kolaborasi bidan dan dokter dalam pelayanan kebidanan dan kandungan. Penelitian ini menggunakan metode pendekatan penelitian kuantitatif dengan pendekatan analisis yuridis sosiologis, dan spesifikasi penelitian deskriptif. Lokasi penelitian di Rumah Sakit Ibu dan Anak Bunda Arif Purwokerto. Pengambilan sampel melalui metode simple random sampling. Data yang digunakan meliputi data primer dan data sekunder yang diperoleh dengan metode angket, dokumenter dan kepustakaan. Pengolahan data secara coding, editing, dan tabulasi kemudian data disajikan secara teks naratif dan tabel data. Analisis data menggunakan metode distribusi frekuensi analisis, tabel silang analisis, analisis isi dan analisis perbandingan. Hasil penelitian menunjukkan bahwa terhadap implementasi hukum pelayanan kolaborasi bidan dan dokter dalam pelayanan kebidanan dan kandungan adalah efektif. Hal ini dapat dibuktikan dengan hasil penelitian terhadap (lima) indikator meliputi efektifnya pelaksanaan manajemen kebidanan kolaborasi, efektifnya pelaksanaan pengkajian kebutuhan asuhan pada kasus beresiko tinggi dan kegawatdaruratan, efektifnya pelaksanaan pemberian asuhan kebidanan pada kesehatan ibu hamil, efektifnya pelaksanaan pemberian asuhan kebidanan pada masa persalinan dan masa nifas, efektifnya pemberian asuhan kebidanan pada bayi baru lahir dan atau balita dengan resiko tinggi. Faktor kedisiplinan sebagai faktor personal sedangkan faktor fasilitas dan faktor kerja sama termasuk dalam faktor sosial cenderung berpengaruh secara positif terhadap implementasi hukum pelayanan kolaborasi bidan dan dokter dalam pelayanan kebidanan dan kandungan di Rumah Sakit Ibu dan Anak Bunda Arif Purwokerto.

***ABSTRACT***

*The objective of this study was to find out the legal implementation of collaboration service between midwifery and obstetricians and the influence of discipline, facilities and cooperation factors toward the legal implementation of collaboration services between midwifery and obstetrician. This study used a quantitative research with a sociological juridical analysis approach, and descriptive research specification. The location of the research was Bunda Arif Hospital of Purwokerto. Sample determination used simple random sampling. The primary and secondary data was obtained by questionnaire, documentary and library methods which was processing with coding, editing, and tabulating then the data is presented in narrative text and tables. Data analysis using analysis frequency distribution method, cross table analysis, content analysis and comparison analysis. The results of the study indicated that the implementation of the law on the collaboration of midwifery and obstetrician was effective. This could be proven by the results of research on (five) indicators including the effective implementation of collaborative midvery management, the effective implementation of the assessment of care needs in high-risk and emergency cases, the effective implementation of providing midwifery care for the health of pregnant women, the effective implementation of midwifery care during childbirth and the postpartum period, the effectiveness of providing midwifery care for newborns and or toddlers with high risk. The discipline factor as a personal factor while the facility factor and the cooperation factor included in the social factor tend to have a positive effect on the legal implementation of the collaboration service of midwifery and obstetrician at the Bunda Arif Hospital of Purwokerto.*
