

## RINGKASAN

**Karist Dwi Wibowo. P2B019004.** “Partisipasi Anggota Kelompok Afinitas Pada Program Desa Mandiri Pangan Di Desa Adisana Kecamatan Kebasen Kabupaten Banyumas”. Tesis. Program Studi Magister Penyuluhan Pertanian. Fakultas Pascasarjana, Universitas Jenderal Soedirman. 2022.

Program Desa Mandiri Pangan di desa sasaran sangatlah diperlukan dari tahap awal bahkan hingga kebelanjutan program. Partisipasi masyarakat sangat diperlukan, baik dalam bentuk waktu, tenaga, maupun material untuk kesuksesan pelaksanaan program. Diharapkan setelah program berjalan dalam jangka panjang terdapat peningkatan dalam partisipasi yang dapat dilihat dari adanya perubahan terhadap aspek perencanaan, pelaksanaan, manfaat dan evaluasi.

Penelitian ini bertujuan untuk: (1) mendeskripsikan partisipasi anggota kelompok afinitas terhadap keberhasilan program desa mandiri pangan di Desa Adisana Kecamatan Kebasen Kabupaten Banyumas; (2) menganalisis hubungan antara tingkat partisipasi anggota kelompok afinitas terhadap keberhasilan program desa mandiri pangan di Desa Adisana Kecamatan Kebasen Kabupaten Banyumas.

Metode mencapai tujuan tersebut adalah menggunakan penelitian survei dengan pendekatan *Mixed Method*. Penelitian ini dilaksanakan di Desa Adisana, Kecamatan Kebasen, Kabupaten Banyumas selama lima bulan. Data kuantitatif yang diperoleh dianalisis menggunakan Statistik Deskriptif dan Korelasi *Rank Spearman* dan data kualitatif dianalisis secara deskriptif. Populasi penelitian ini yaitu anggota kelompok afinitas di Desa Adisana berjumlah 60 orang. Sampel penelitian berjumlah 60 orang. Pengambilan sampel menggunakan teknik *probability sampling* atau sensus. Instrumen pengumpulan data menggunakan angket kuesioner dan wawancara sebagai alat pengumpul data.

Hasil penelitian dan pembahasan dalam penelitian ini menunjukkan bahwa (1) tingkat partisipasi anggota kelompok afinitas pada program desa mandiri pangan aspek perencanaan 61,7 %, aspek pelaksanaan 70 %, aspek manfaat 65 % dan aspek evaluasi 65 % ) rata-rata kategori tingkat partisipasi sedang terhadap keberhasilan program desa mandiri pangan, (2) hasil uji korelasi *Rank Spearman* menunjukkan bahwa partisipasi aspek perencanaan berhubungan, dengan tingkat hubungan sedang dan searah dengan keberhasilan program desa mandiri pangan, aspek pelaksanaan berhubungan, dengan tingkat hubungan lemah dan searah dengan keberhasilan program desa mandiri pangan, partisipasi aspek manfaat berhubungan, dengan tingkat hubungan lemah dan searah dengan keberhasilan program desa mandiri pangan, dan partisipasi aspek evaluasi berhubungan, dengan tingkat hubungan sedang dan searah dengan keberhasilan program desa mandiri pangan.

Data kuantitatif tersebut didukung dengan hasil wawancara kepada beberapa responden yang menyatakan bahwa variabel tingkat partisipasi berhubungan dengan keberhasilan program desa mandiri pangan dengan tingkat kekuatan sedang, lemah dan searah. Dengan demikian data kualitatif ini memperkuat data kuantitatif dan memperluas data kuantitatif yaitu dengan menambahkan fenomena-fenomena lain yang berhubungan dengan keberhasilan Program Desa Mandiri Pangan.

**Kata kunci:** partisipasi dan keberhasilan program desa mandiri pangan

## SUMMARY

Karist Dwi Wibowo. P2B019004. "Participation of the Affinity Group Members in the self sufficient food Village Program in Adisana Village, Kebasen District, Banyumas Regency". Thesis. Agricultural Extension Masters Study Program. Postgraduate Faculty, Jenderal Sudirman University. 2022

The Food Independent Village Program in the target village is very necessary from the initial stage even to the sustainability of the program. Community participation is very necessary, both in the form of time, man power, and materials for the successful implementation of the program. It is hoped that after the program runs in the long term there will be an increase in participation which can be seen from changes to aspects of planning, implementation, benefits and evaluation.

This study aims to: (1) describe the participation of members of affinity groups on the success of the self sufficient food villae program in Adisana Village, Kebasen District, Banyumas Regency; (2) analyze the relationship between the level of participation of members of the affinity group to the success of the self sufficient village program in Adisana Village, Kebasen District, Banyumas Regency.

The method to achieve this goal is to use survey research with a Mixed Method approach. This research was conducted in Adisana Village, Kebasen District, Banyumas Regency for five months. The quantitative data obtained were analyzed using Descriptive Statistics and Spearman Rank Correlation and the qualitative data were analyzed descriptively. The population of this study, namely members of the affinity group in Adisana Village, amounted to 60 people. The research sample amounted to 60 people. Sampling using probability sampling or census techniques. The data collection instrument used questionnaires and interviews as a data collection tool.

The results and discussion in this study indicate that (1) the participation rate of members of the affinity group in the food independent village program is 61.7% in planning aspects, 70% in implementation aspects, 65% in benefit aspects and 65% in evaluation aspects. moderate to the success of the food independent village program, (2) the results of the Spearman Rank correlation test show that participation in planning aspects is related, with a moderate level of relationship and in the same direction as the success of the food independent village program, implementation aspects are related, with a weak level of relationship and in line with the success of the village program. food self-sufficiency, participation in the benefit aspect was related, with a weak relationship level and in line with the success of the food independent village program, and participation in the evaluation aspect was related, with a moderate level of relationship and in line with the success of the food self-sufficient village program.

The quantitative data is supported by the results of interviews with several respondents who stated that the variable level of participation was related to the success of the food independent village program with moderate, weak and unidirectional strength levels. Thus, this qualitative data strengthens quantitative data and expands quantitative data by adding other phenomena related to the success of the Food Independent Village Program.

**Keywords:** participation and success of the food independent village program
