- Lull, J. (2011). Hegemony is the power or dominance that one social group holds over others. This can refer to the “asymmetrical interdependence” of political-economic-cultural relations between and among nation-states (Straubhaar, 1991) or differences between and among social classes within a nation. Hegemony is “dominance and subordination in the field of relations structured by power” (Hall, 1985). But hegemony is more than social power itself; it is a method for gaining and maintaining power. *Gender, Race, and Class in Media: A Critical Reader*, 33.
