## Abstract

### Description of Knowledge, Attitudes, and Motivation of Nurses in Fulfilling the Spiritual Needs of Patients in the ICU Room

*Rizky Nurhidayah<sup>1</sup>, Iwan Purnawan<sup>2</sup>, Galih Noor Alivian<sup>3</sup>*

**Background:** Nurses as professional health workers must provide comprehensive services to patients covering bio-psycho-social and spiritual aspects. ICU patients are very dependent on their needs so they are prone to experiencing spiritual distress. Meeting spiritual needs helps increase motivation to heal and find meaning in life. This study aims to describe the knowledge, attitude, and motivation of nurses in meeting the spiritual needs of patients in the ICU.

**Methodology:** This type of research is descriptive quantitative with a cross sectional approach. Sampling using a total sampling technique, amounting to 72 respondents. Retrieval of data using a questionnaire. Data analysis used univariate tests.

**Research Results:** The results of the study found that the majority of respondents were aged 35-45 (late adulthood), women, SI nurses, and had worked for more than 10 years. In addition, the majority of respondents have high knowledge, positive attitude, and high motivation.

**Conclusion:** The majority of nurses' knowledge, attitudes, and motivation in meeting the spiritual needs of patients in the ICU room are in the good and positive category.

**Keywords:** ICU, Nurse, Spiritual
