SUMMARY

This research is a descriptive quantitative study using a survey method to students of the Faculty of Economics and Business, Jenderal Soedirman University.

Aims to analyze the effect of hedonic shopping value on impulse buying with shopping lifestyle as a mediating variable. The method used in this study uses random sampling technique by taking 97 samples of respondents. Analysis was used using SPSS (Statistical Product and Service Solution) with the following results:

(1) hedonic shopping value has a positive effect on impulse purchases, (2) hedonic shopping value has a positive effect on shopping lifestyle, (3) shopping lifestyle has a positive effect on impulse purchases, and (4) shopping lifestyle mediates the effect of the hedonic shopping value relationship on impulse purchases. The implication of this research is that Shopee can continue to improve the consumer shopping experience by increasing features, quality, and consumer safety so that impulse purchases will occur a lot. Business actors can increase sales through unplanned purchases by providing various types of product choices and promotions so that consumers are tempted by product offers and availability.
