Abstrak

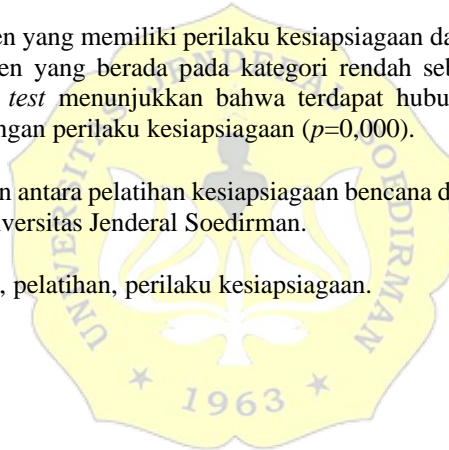

**Latar belakang:** Kesiapsiagaan adalah serangkaian kegiatan untuk mengantisipasi bencana melalui tindakan yang tepat dan efisien. Kesiapsiagaan sangat penting dalam penanggulangan bencana. KSR PMI Unit Universitas Jenderal Soedirman sebagai komunitas di perguruan tinggi memiliki peran penting dalam penanggulangan bencana. Penelitian ini bertujuan untuk mengetahui hubungan antara pelatihan kesiapsiagaan bencana dengan perilaku kesiapsiagaan KSR PMI Unit Universitas Jenderal Soedirman

**Metodologi:** Penelitian ini menggunakan pendekatan *cross sectional*. Penelitian ini melibatkan 65 sampel anggota KSR PMI Unit Universitas Jenderal Soedirman dan teknik pengambilan sampel dalam penelitian ini adalah *total sampling*. Instrumen dalam penelitian ini yaitu kuesioner perilaku kesiapsiagaan yang dimodifikasi dari kuesioner Mutiasih (2021) and Ramadhanty (2021). Analisis data yang digunakan adalah uji *Fisher's Exact Test*.

**Hasil Penelitian:** Responden yang memiliki perilaku kesiapsiagaan dalam kategori tinggi sebanyak 86.2%, sedangkan responden yang berada pada kategori rendah sebanyak 13.8%. Analisis data dengan uji *Fisher's Exact test* menunjukkan bahwa terdapat hubungan yang signifikan antara pelatihan kesiapsiagaan dengan perilaku kesiapsiagaan ( $p=0,000$ ).

**Kesimpulan:** Ada hubungan antara pelatihan kesiapsiagaan bencana dengan perilaku kesiapsiagaan anggota KSR PMI Unit Universitas Jenderal Soedirman.

**Kata kunci:** Kesiapsiagaan, pelatihan, perilaku kesiapsiagaan.

Abstract

**Background:** Preparedness was a series of activities to anticipate disasters through appropriate and efficient measures. Preparedness is critical in disaster management. The KSR PMI Unit of Universitas Jenderal Soedirman, as a community or organization in higher education, has an essential role in disaster management. This study aims to investigate the association between disaster preparedness training and the preparedness behavior of the KSR PMI Unit of Universitas Jenderal Soedirman.

**Methods:** The study used a cross-sectional approach. The study involved a of sample 65 members of KSR PMI Unit of universitas Jenderal Soedirman, and the sampling technique of this study was total sampling. The instrument in this study was the preparedness behavior questionnaire which was modified from Mutiasih (2021) and Ramadhanty (2021) questionnaire. Analysis of the data used was the Fisher's Exact test.

**Results:** Respondents who had preparedness behavior in the high category were 86.2%, while respondents who were in the low category were 13.8%. Data analysis using the Fisher's Exact test showed that there was a significant relationship between preparedness training and preparedness behavior ( $p=0.000$ ).

**Conclusion:** There was a relationship between disaster preparedness training and the preparedness behavior of KSR PMI Unit members at Universitas Jenderal Soedirman.

**Keywords:** Preparedness, preparedness behavior, training.
