ABSTRAK

Penelitian ini bertujuan untuk mengetahui tingkat kesadaran hukum masyarakat terhadap program imunisasi dan kontribusi kesadaran hukum masyarakat terhadap program imunisasi dalam peningkatan derajat kesehatan anak di Desa Bayongbong, Kecamatan Bayongbong, Garut, Jawa Barat. Penelitian ini menggunakan metode penelitian kuantitatif dengan pendekatan yuridis sosiologis. Penelitian ini berlokasi di Desa Bayongbong, Kecamatan Bayongbong, Garut, Jawa Barat. Sumber data yang digunakan dalam penelitian ini adalah sumber data primer dan sekunder. Pengambilan sampel penelitian menggunakan *simple random sampling*. Data yang terkumpul diolah menggunakan teknik *editing, coding, dan* tabulasi. Analisis data menggunakan distribusi frekuensi analisis, tabel silang analisis, analisis isi dan analisis perbandingan. Hasil penelitian menunjukkan bahwa kesadaran hukum masyarakat terhadap program imunisasi dalam peningkatan derajat kesehatan anak di Desa Bayongbong, Kecamatan Bayongbong, Garut, Jawa Barat adalah tinggi, hal ini dapat diukur dengan indikator sebagai berikut : tingginya tingkat pengetahuan hukum masyarakat terhadap program imunisasi; sedangnyanya tingkat pemahaman hukum masyarakat terhadap program imunisasi; banyaknya sikap hukum masyarakat yang setuju terhadap program imunisasi; dan banyaknya pola perilaku hukum masyarakat yang sesuai terhadap program imunisasi. Kesadaran hukum masyarakat terhadap program imunisasi memberikan kontribusi secara positif terhadap upaya peningkatan derajat kesehatan anak. Hal ini mengandung arti bahwa semakin tinggi tingkat kesadaran hukum masyarakat terhadap program imunisasi, maka akan semakin meningkat pula derajat kesehatan anak.

Kata Kunci : Derajat Kesehatan Anak; Kesadaran Hukum Masyarakat; Program Imunisasi.

**COMMUNITY LEGAL AWARENESS OF IMMUNIZATION PROGRAMS IN
INCREASING CHILD HEALTH DEGREES
(Study in Bayongbong Village, Bayongbong Subdistrict, Garut, West Of Java)**

ABSTRACT

This study aims to determine the level of community legal awareness of the immunization program and the contribution of community legal awareness of the immunization program in improving children's health status in Bayongbong Village, Bayongbong District, Garut, West Java. This study uses a quantitative research method with a sociological juridical approach. This research is located in Bayongbong Village, Bayongbong Subdistrict, Garut, West Of Java. Data sources used in this study are primary and secondary data sources. The research sample was taken using simple random sampling. The collected data is processed using editing, coding, and tabulation techniques. Data analysis used frequency distribution analysis, cross-table analysis, content analysis and comparative analysis. The results showed that the community's legal awareness of the immunization program in improving children's health status in Bayongbong Village, Bayongbong District, Garut, West Java was high, this could be measured by the following indicators: the high level of community legal knowledge of the immunization program; the moderate level of legal understanding of the community regarding the immunization program; the large number of people's legal attitudes that agree with the immunization program; and the many patterns of community legal behavior that are appropriate to the immunization program. Public legal awareness of the immunization program contributes positively to efforts to improve children's health status. This implies that the higher the level of public legal awareness of the immunization program, the higher the child's health status will also increase.

Keywords: Child Health Degree, Community Legal Awareness, Immunization Program.
