

CHAPTER V

CONCLUSION

A. Conclusion

Based on the results of the explanation above, it can be concluded as follows:

1. Implementation of Assimilation in the Permisan Nusakambangan Class IIA Correctional Institution is carried out in the Permisan Nusakambangan Class IIA Correctional Institution through an Assessment conducted by Correctional Institution Officers assisted by Correctional Center Officers, and assisted by Third Parties. The obstacles faced are in terms of Structure, namely the lack of Correctional Institution Officers to conduct Assessments to Inmates so that there is assistance from Correctional Center Officers, and in terms of Culture, Inmates do not understand the Rights and Obligations of Inmates as stipulated in Act Number 22 of 2022 concerning Corrections.
2. Comparison of Assimilation in Indonesia and the United States seen:
 - a. In terms of substance, Indonesia has legislation specifically regulating assimilation, namely Act Number 22 of 2022, while the United States does not have legislation specifically regulating assimilation, so that each correctional institution has a different assimilation policy.
 - b. In terms of structure, assimilation in Indonesia is granted by the Director General of Corrections on behalf of the Minister which is then implemented by Correctional Officers. In the United

States, all matters relating to Assimilation are only carried out by Correctional Officers, and there is no interference from other parties.

- c. In terms of culture, Inmates in Indonesia do not know the substance of the rights and obligations as stipulated in Act Number 22 Year 2022. In the United States, Inmates understand the entire substance of existing rights and obligations.

B. Suggestion

The suggestions that researchers can convey based on the results of the study, namely:

1. There needs to be an addition in the Correctional Institution Officer Section so that there is no shortage of officers to conduct Assessment before the Inmate gets Assimilation, as well as providing basic socialization of substance regarding the Rights and Obligations of Inmates to Inmates.
2. The authorities in the Correctional Institution need to conduct a comparative study, especially regarding the implementation of Assimilation in the United States so that they can develop the implementation of Assimilation properly.
