CHAPTER V
CONCLUSION AND SUGGESTION

1.1 Conclusion

Banyumas Regency is one of the areas where people more often use local languages in daily communication and maybe not many foreign tourists come to Banyumas, so the difficulty experienced is difficulty in searching data because there are still very few tourist attractions that use English in their promotions. Difficult to find tourist promotion brochures that use English because of technological advances so that tourist attractions often promote their tours using Instagram, where on Instagram itself no one promotes using English.

5.2 Suggestion

Conduct English and IT training for teenagers to adults. So that more and more Banyumas people are created, especially students and people who are still in productive age who can speak foreign languages, especially English and IT so that Tourism in the Regency Banyumas can attract the attention of foreign tourists.
