SUMMARY

Togel gambling is a gambling that is often found in the community, one of which is in Penaruban village. This research uses a descriptive qualitative method to explain the behavior of installing togel among Penaruban villagers. The technique of determining informants used snowball sampling with the main target of togel players and supporting targets, namely togel sellers, families of players, families of togel sellers, community leaders, religious leaders, housewives, village officials, and Purbalingga police officers. Data were collected through observation, in-depth interviews and documentation.

Togel in Penaruban has led to the behavior of searching for the right numbers, dream interpretation, natural codes, the help of shamans, and asking crazy people. Fund-raising behavior by getting into debt and cheating. The behavior of utilizing the winnings as a means of fulfilling needs and sharing gambler friends, and gambling capital. Togel in Penaruban is also studied in social action theory, namely instrumental rationality actions in the form of finding the right numbers, value rationality actions in the form of economic value expectations, affectionate actions in the form of feelings of victory and defeat, traditional actions where gambling is considered part of the tradition. The causes of togel in Penaruban are influenced by environmental factors, economic uncertainty, weak law enforcement, and the strength of the togel network in Penaruban.

The togel players in Penaruban are expected to think more realistically. The community environment is expected to firmly control the existence of togel gambling activities in Penaruban Hamlet. This research is expected to be useful for the community, community organizations, government and law enforcement officials in making policies related to gambling and can be useful for the development of the sociology of deviant behavior and useful for further research.
