

## **CHAPTER 5**

### **CONCLUSIONS AND SUGGESTIONS**

In this chapter, the researcher presented the research results from what the researcher collected from the research field study which consists of conclusions and suggestions for better teaching and learning process.

#### **5.1 Conclusions**

This descriptive qualitative research aims to describe how English songs is used in learning English listening skills and the problems the researcher found during the learning process. The researcher used observation, interviewed the English teacher, and distributed a questionnaire to the students to conduct the data.

Based on the research result, using English songs as a medium to learn English listening skills is an effective way to the use; it also can make students more interested to learn English and increase their listening skill ability. However, the researcher found some problems related to using English songs as a medium during the learning process like lack of facilities that support the learning process, some students need help understanding the lyrics, and some students making noise in class.

#### **5.2 Suggestions**

##### **1. Suggestion for The School**

From the result findings before, it shows that learning English by using English songs was successful in the learning process, and the students were interested in learning. So to support the implementation of learning English, especially in listening skills, the school must support school facilities with various learning media. For example: providing every class with a good speaker that can use.

##### **2. Suggestion for The Teacher**

Teachers can apply the used English song as a learning media as well. Before the teacher starts learning the application

of English songs as a learning media, they should ask the student to make some agreement. For example, if students make noise and disturb their friends, they will get punished.

### 3. For The Student

This research showed us that using English songs to learn listening skill is more effective on student interest than using any learning media to learn listening skill. Therefore, the student must pay more attention to the teacher's explanation of the material to the appropriate learning process with a lesson plan.

### 4. Suggestion for The Next Researcher

For the next researcher who will conduct related to this research using English song as a learning media, the researcher suggested that the result of this research can be used as a research reference. It means that the next researcher can give a detailed explanation and more excellent to improve the result of this research.
