

5.2 Suggestion

There are many research ideas that can be suggested for the future research. As this research only covers broadcasting on television, live football match commentary language on radio can be used as a sole research or as a comparison study. Moreover, the advance of broadcasting football events since the internet has given a new way of live commentary. There is live football match text commentary which is very popular nowadays. It can be very referential if a research is conducted to analyze the register and the syntactic aspects of commenting in text through a timeline during the live match. The last but not least, it is also possible to observe football commentary in computer gaming. Although they are recorded, but it is not insignificant to test its level of authenticity compared with the real football match commentary.
