ABSTRACT
**DESCRIPTION OF KNOWLEDGE ABOUT COVID-19 AFTER 3 YEARS OF THE
PANDEMIC IN THE COMMUNITY OF THE NURSING DEPARTMENT, FACULTY OF
HEALTH SCIENCES, JENDERAL SOEDIRMAN UNIVERSITY**

Surie Tresna Lestari Yusuf¹, Wahyu Ekowati², Hasby Pri Choiruna³

Background : Coronavirus Disease or what is known as Covid-19 is a pandemic that occurs throughout the world, caused by SARS covid2 which attacks the respiratory system and is transmitted through infected droplets. After 3 years of facing a pandemic, the government finally decided that the status of the Covid-1-9 pandemic had changed to an endemic disease in Indonesia. This research aims to find out a picture of knowledge about Covid-19 after 3 years of the pandemic in the community of the nursing department, faculty of health sciences, Jenderal Soedirman University.

Methodology: This research uses quantitative research with descriptive methods. The total sample was 272 community members majoring in nursing. The research instrument used a questionnaire. Data analysis uses univariate analysis.

Research Result: There were more female respondents than male respondents (90.8% compared to 9.2%). Most of the respondents' roles in the community are students (93,75%), lecturers (5.51%), and staff employees (0.74%).

Conclusion: Most of the community members have good knowledge about Covid-19 after 3 years of the pandemic.

Keywords: Covid-19, knowledge, pandemic
