

## CHAPTER V

### CLOSING

#### A. Conclusions

Based on the results of research and discussion of research on the fulfilment of the rights of terrorism prisoners at the High Risk Correctional Institution IIA CLASSPasir Putih Nusakambangan, it can be concluded that :

1. The implementation of the fulfilment and service of the rights of terrorism prisoners in the High Risk Correctional Institution IIA CLASSPasir Putih Nusakambangan has not been implemented effectively. This is because there are still rights that have not been implemented and some prisoners who are not cooperative or do not want or even refuse to be given rights services on the grounds that they do not want to open themselves up to be given rights services.
2. The inhibiting factor for the fulfilment of the rights of terrorism prisoners at the High Risk Correctional Institution IIA CLASSPasir Putih Nusakambangan is the number of officers who are not proportional to the number of prisoners. In addition, another inhibiting factor is that there are still prisoners who are not cooperative with the rules that apply to prisoners.

## B. Advice

After conducting research on the effectiveness of the fulfilment of the rights of terrorism prisoners at the High Risk Correctional Institution IIA CLASSPasir Putih Nusakambangan, there are several things that make suggestions for the implementation of the fulfilment of the rights of terrorism prisoners at Pasir Putih Nusakambangan Correctional Institution to be carried out better, namely :

1. It is necessary to increase the quantity of correctional officers that can be adjusted to the ideal quantity of prisoners so that correctional officers do not face a double workload or double side job
2. Specialised training is needed for correctional officers in order to increase qualified resources to be able to handle high-risk prisoners.
