

CHAPTER V

CONCLUSION AND SUGGESTION

A. Conclusion

After carrying out job training at Dinporabudpar Banyumas, the product is a digital Banyumas arts booklet. The concept in making this booklet is that it contains antique and classic elements because it contains various kinds of traditional arts found in Banyumas. The booklet contains pictures of art and is also accompanied by explanations so that it makes it easier for readers to understand the art being viewed.

Making this art booklet is quite time consuming because the editing and translation process is quite long in order to get maximum result. Besides, the very friendly Dinporabudpar staffs made the author even more feel comfortable during the process of making the art booklet. In the end, this digital arts booklet was completed with a satisfactory final result.

After doing job training at Dinporabudpar, the author can also feel what it is like to be an employee there. Every time there is an art event, the head of the department always invites the writer to take part in the event so that the writer can observe directly. The author got a lot of positive energy there so that this digital booklet could be completed well. After the product is finished, the product was handed over to Dinporabudpar to be distributed widely.

B. Suggestion

Based on the results of observations and work practices that have been carried out, information was obtained that previously Dinporabudpar had produced arts booklets but in Indonesian and in printed form. So there needs to be improvement in terms of promoting Banyumas arts, one of which is by making Banyumas arts booklets in digital form and compiled in English, so that when foreign tourists come to visit Banyumas they can learn about the arts in Banyumas. The next suggestion is for the Dinporabudpar to be more active in promoting the arts in Banyumas to foreign tourists because apart from providing additional income, the arts in Banyumas will become more widely known, not only by local residents but also abroad.
