

## CHAPTER V

### CONCLUSION AND SUGGESTION

#### 5.1 Conclusion

The researcher analyzes the register that is used in Korean Englishman YouTube videos from August 3rd, 2022 to November 9th, 2022 using Finch's theory. After analyzing the data, the researcher concludes. They are:

1. The registers in Korean Englishman YouTube videos are 46 data. The data are classified into 8 classifications based on their characteristics. Based on the explanation in the previous chapter, 46 registers used by British high schoolers in Korean Englishman YouTube videos were found. From the 46 registers found, after being compared with the lexical meaning in general, it is found that each food register meaning and lexical meaning have similar characteristics. Whether from the characteristics of texture, appearance, taste, and others.
2. The functions of registers that are used in Korean Englishman YouTube videos from August 3rd, 2022 to November 9th, 2022 are casual register and consultative register. There are casual registers (73.9%), and consultative register (26.1%). Based on the percentage, the highest frequency data on the functions of register in this research is casual register which is 73.9%. This might happen because all of the situations in the video are informal, they mostly talk to each other in informal language because they are classmates. The interaction between the

British Highschoolers and Joshua was also informal. They used informal language and often threw jokes at each other.

## 5.2 Suggestion

After concluding the food register that is used by British Highschoolers in Korean Englishman YouTube videos in the previous chapter, the researcher would like to present suggestions, as follows:

### 1. English Department Students

Hopefully, this research of register used in Korean Englishman YouTube videos can support the use of register theory for English Department students about linguistic form and the meaning of register. The result of this research can be used as guidance and the additional references of register especially in the field of food.

### 2. Other researchers

It is also useful for other researchers to increase their vocabulary in register by conducting more research in different fields. Furthermore, people can use this research as one of their references and guidance in researching the field of food.

### 3. Food Enthusiast

The last part is aimed for food enthusiasts who are interested in finding any references of registers used in social media, especially on YouTube. Hopefully, this research can be useful as much as possible for them.
