

CHAPTER V

CONCLUSIONS AND SUGGESTIONS

This chapter presents the conclusion and the suggestions for further research based on the result of the study.

5.1 Conclusions

After conducting and observing the research about *The Use of Movie Clips as Media to Teach Recount Text (A Descriptive Qualitative Study at 8th Grade of MTs Al-Mukarromah Sampang Cilacap in the Academic Year of 2023/2024)* as stated in the previous chapter it can be concluded that:

First, the use of movie clips in teaching recount text was successful and made good changes in English language learning at class 8A MTs Al-Mukarromah Sampang Cilacap. The use of movie clips as media in English classes can increase student enthusiasm and focus on following the material presented by the teacher. The movie clip media can be adapted to the material and output desired by the teacher; this can be varied in various ways and steps. Furthermore, there are many media sources for movie clips on the Internet.

Second, the problems that teachers faced when implementing movie clips as a medium in teaching recount text were two types: internal and external. Internal factors came from the students themselves, like a lack of vocabulary, grammar errors, and low interest in learning English. Meanwhile, external factors came from the environment and the equipment, such as a Lack of time to do the worksheet and misspellings.

Third, Even though there were some problems faced by teachers when implementing movie clips as a medium in teaching recount text, the teachers can handle these obstacles well. Some of the solutions teachers used when encountering problems in the classroom are providing more examples of simple past tense, explaining the material again, preparing good equipment, and managing time allocation.

5.2 Suggestions

This research is still far from perfection, therefore there are several suggestions to make it better as stated below:

1. For the Teacher

In using movie clips, teachers must look for clips that are appropriate for the students' age, do not contain nervous elements, and do not contain pornography. The important thing is that they must be appropriate and linear with the English language material. Then, the teacher must be well prepare and enthusiastic in implementing and in the class because the teacher's enthusiasm greatly influences the level of student activity in the class.

2. For the Students

Students must be more diligent and enthusiastic in learning so that it will be easier to improve their English skills and grades.

3. For Other Researcher

Browse more movie clips that are better and newest so that they will be in line with current developments and students' knowledge. Please

communicate with the teacher what should be prepared before entering the classroom and prepare suits the desired output
