

CHAPTER V CONCLUSION AND SUGGESTION

A. Conclusion

There are several important results and lessons learned during job training for the Pro 2 English Corner program at RRI Purwokerto. In the implementation of job training, there are three stages, namely preparation, production, and post-production. Of the three stages, there is one stage that is quite difficult to implement, namely preparation. This stage is quite difficult because of the selection of guests as performers. And from this job training, several important things can be learned. First, good planning and coordination are important in every activity. Secondly, this job training also hones leadership skills and the ability to manage time efficiently. In addition, we also learn good interpersonal communication skills and the ability to discuss effectively. Lastly, this job training teaches you how to handle projects in a thorough and structured manner.

B. Suggestion

On this occasion, suggestions are presented for Pro 2 Purwokerto to be evaluated and considered for the English Corner in the future. Here are some suggestions for Pro 2 Purwokerto:

1. Expanding the network, so that guests, themes, and materials can be varied.
2. Increasing the promotion of English Corner through social media, so this program can be widely known by listeners, especially by students as the main target of this program.
3. Upgrading the broadcaster English skills including speaking, grammar, and vocabulary.
