

CHAPTER V

CLOSING

A. Conclusion

Based on the results of the research and discussions carried out, it can be concluded that:

1. The decision of the Central Jakarta Commercial District Court Number 78/Pdt.Sus-HKI/Industrial Design/2022/PN Niaga Jkt.Pst is in accordance with Articles 2 and 4 of Law Number 31 of 2000 concerning Industrial Design in providing legal protection to CV. Rajawali Diesel as the Plaintiff is the owner of the Inverter Generator Industrial Design whose rights have been violated by Tommy Admadiredja as the Defendant.
2. The legal consequences arising from the decision of the Central Jakarta Commercial District Court Number 78/Pdt.Sus-HKI/Industrial Design/2022/PN Niaga Jkt.Pst are the cancellation of the industrial design certificate owned by Tommy Admadiredja as Defendant which resulted in the elimination of all legal consequences relating to industrial design rights and other rights originating from the industrial design, as well as being sentenced to the Defendant to pay court costs in the amount of Rp. 1,240,000,- (one million two hundred and forty thousand rupiah).

B. Suggestion

1. Business actors should be more careful before submitting an application for registration of their industrial design and pay more attention to the

novelty aspect of their industrial design before applying for registration so that there is no unlawful act that could give rise to a dispute.

2. In order to minimize violations in the registration of industrial designs, it would be best for the Directorate General of Intellectual Property, as the authorized party to examine industrial designs for which registration applications are submitted, to be more thorough and careful in examining industrial designs for which registration applications are submitted so that errors do not occur that could give rise to disputes.
