

## **CHAPTER V CONCLUSION AND SUGGESTION**

### **A. Conclusion**

The conclusion that can be drawn from the first chapter to the fourth chapter in the process of making an English - Indonesian zine as a form of the author's final project product is that it is a long process that the author goes through. This process begins with carrying out approximately 15 weeks of job training. During job training the author makes observations related to Edu Train activities. In order to get information related to Edu train activities the author conducts interviews with officers. Not only officers the author also interviews passengers in order to get more information. In addition to conducting observations and interviews the author conducts documentation methods during the implementation of practical work such as taking pictures during Edu train activities and supporting information documents included in the final project report.

From the observation process and the data obtained during the job training, the author realized that there are three important things in making a zine. These three things are important processes that must be considered in making zines, such as determining concepts, designing, and printing zines are important parts of this process. The author hopes that this English - Indonesian zine can be used as a useful learning media so that it can help facilitate the passenger transportation unit in carrying out Edu train activities and children will gain new knowledge.

### **B. Suggestion**

Based on the experience and data that the author obtained during the internship, there are several suggestions that the author can give, as a student going to do job training at PT KAI Daop V Purwokerto, It should be noted that each unit has its own benefits, so it needs to be adjusted to the needs in writing the final project. In writing the final project, patience and thoroughness are needed so that a plan is needed in making a time line. Including in the making of this zine can still be reprocessed both in content and design. there are also suggestions for PT KAI Daop V purwokerto in the use of this zine can be developed into a more informative alternative media platform because there is more information and updates on procedures available at the

station. as well as the need for a special room when implementing Edu train material so that other passengers are not disturbed in their mobilization.
