

## CHAPTER V

### CONCLUSIONS AND SUGGESTIONS

In this chapter, the researcher presents the conclusions and suggestions drawn from the research. After outlining the conclusions, the researcher proposes suggestions for the research findings.

#### 5.1 Conclusions

Following the previous chapter on findings and discussion, the conclusion can be drawn into three parts based on the research questions:

##### 5.1.1 Quizizz Implemented by Teacher in Teaching Reading

Based on the first research question related to Quizizz implementation by the teacher in teaching reading. The teacher implemented Quizizz in the classroom easily without any difficulties. Based on the gathered data, the teacher did not implement the lesson plan exactly in the lesson plan format, but it was still aligned. Instead, the teacher used various sources to explain the material, from the handbook and the internet. Teaching activities are divided into pre-teaching, whilst-teaching, and post-teaching. In addition, it found that the teacher strives to create an interactive and enjoyable classroom atmosphere that motivates students by using Quizizz. Before using Quizizz, teachers remind students to ensure their devices and internet connections are working properly and not cheat. In addition, besides being used as a learning medium in class, teachers also assign homework using Quizizz. In conclusion, the teacher easily implemented Quizizz in the classroom activities making the learning process more interactive.

### **5.1.2 Students' Perceptions toward Quizizz as Online Learning Media for RC**

Based on the findings, Quizizz had both positive and negative perceptions by students. Quizizz is a user-friendly learning media. Quizizz is accessible on students' phones or laptops, allowing them to complete their tasks conveniently. Additionally, the engaging features of Quizizz also captured the students' interest. The ranking board on Quizizz also motivates students to aim for top positions, fostering a competitive spirit among them. Additionally, upon completing a quiz, students receive feedback on their performance, including incorrect and correct answers. This feature enables students to understand their mistakes better and to conduct self-evaluations. The students desire to use Quizizz to continually enhance their learning outcomes. Most students recommend Quizizz as an online learning tool to their peers. Besides, students also claimed that the use of Quizizz still can not prevent them from cheating. This is because students can still browse the answers on the internet. To sum up, there are many positive views of Quizizz as an online learning media in their learning activities, but students also have a negative view of Quizizz.

### **5.1.3 Strengths and Weaknesses of Quizizz as Online Learning Media for RC**

The third research question regarding the strengths and weaknesses of Quizizz as online learning media for RC. Quizizz helps students in understanding unfamiliar words or phrases. Additionally, Quizizz can improve students' reading skills. Furthermore, students find that Quizizz facilitates better learning experience due to its engaging layout, which prevents feelings of boredom. Besides, there are several weaknesses from Quizizz as online learning media. The main weakness is

Quizizz requires strong internet connection, and a supported device. If students experience connectivity problem, it can affect their rankings. Next, students find it difficult to concentrate while using Quizizz because it can distract students and lead them to open other applications. The last weakness is that using Quizizz as online learning media can leave students' data vulnerable to misuse. In sum, Quizizz is an online learning media that has several strengths and weaknesses.

## 5.2 Suggestions

After reflecting on the findings obtained during the research phase, several recommendations from this research have emerged, which can be utilized for future improvements. These recommendations are detailed as follows:

### 5.2.1 For Teachers

The teaching and learning process should be interactive yet exciting. Quizizz has received positive feedback from students, and teachers should consider using it more often to facilitate their classroom activities. With many strengths offered by Quizizz, teachers can provide more interesting learning materials for their students. However, teachers also need to consider any potential weaknesses. Based on research findings, the researcher suggests that teachers should make sure that in using Quizizz students have adequate internet connection, supported devices, and the teacher also should explore about the use of Quizizz in order to fully explore its potential. Moreover, with the positive perception about the use of Quizizz as online learning media, it is hoped that the teacher can use many more online learning media to increase the activeness in the classroom.

### **5.2.2 For Students**

Quizizz in education offers both short and long-term benefits for students. Firstly, students can easily access Quizizz on their phone or laptop. Quizizz's interesting features can motivate students to learn. Hopefully, the continuous use of Quizizz can improve students' learning outcomes. These positive effects should encourage students to understand the material diligently and actively ask questions to facilitate their understanding of assignments or materials. While online learning platforms can have both positive and negative impacts, it is hoped that students will use Quizizz wisely for educational purposes.

### **5.2.3 For Further Researchers**

There is potential for further development in this research. With new innovative ideas in the future, other researchers can use this research to explore different areas. Additionally, the other researchers can investigate the use of Quizizz in other English skills, such as writing and listening, to compare and contrast their findings with the results of this research. Moreover, the other researchers can analyze student perceptions of Quizizz across multiple classes or schools to better understand students' perceptions of Quizizz as an online learning media. Therefore, it is hoped that there will be new insights into the use of educational technology like Quizizz in the field of education in the future.
