

SUMMARY

This research is a quantitative research on the Financial Services Industry listed on the Indonesia Stock Exchange in 2021-2024. This study is titled: "The Influence of Environment, Social, Governance (ESG) Score and Capital Structure on Investment Decisions with Capital Market Fluctuations and Interest Rates as Moderating Variables".

The purpose of this study is to determine the influence of investment decisions based on ESG scores, capital structure, as well as capital market fluctuations, and interest rates as moderation variables between capital structure and investment decisions.

The population in this study is all Financial Services companies listed on the IDX in 2021-2024 that have ESG scores. The number of samples used was 90 samples. The results of this study state that ESG score, and capital structure, have a significant impact on investment decisions. But, the capital structure moderated by interest rates and capital market fluctuation do not have a significant impact on investment decisions.

Keywords: ESG score, capital structure, capital market fluctuations, interest rates, investment decision
