

CHAPTER V

CONCLUSION AND SUGGESTION

In this chapter, the researcher presented the conclusion of the research. The result of this research is in the forms of description of the types, functions, and also implied meanings of hedges in the *Twilight* movie. The researcher also presents the suggestion for the students and other researchers who have interest in conducting the research about hedges.

5.1. Conclusion

As stated in the introduction, this research is aimed to analyze and describe the types, functions, and the implied meanings of hedges which occurs in the first film of Twilight Saga movie series, *Twilight*. From the result and the discussion in the previous chapter which tried to answer the three research questions in Chapter 1, the conclusions are drawn as follows:

The result of the research shows that there are 88 data were found in the first film of Twilight Saga movie series, *Twilight*. The data are divided into four categories based on the types of hedges based on the theory proposed by Yule. Those are the hedges for maxim of quality, quantity, relation and manner. Then, 66 data belong to hedges for maxim of quality, 11 data belong to hedges for maxim of quantity, 3 data belong to hedges for maxim of relation, and 8 data belong to hedges for maxim of manner. Thus, the data which belong to hedges for maxim of quality are the highest percentage of the data. Meanwhile, the data of hedges for maxim of relation are the lowest percentage of the data.

Besides, after analyzing the types or kinds of hedges, the researcher also analyzes the functions of the hedges which occur in the *Twilight* movie based on the theory purposed by Yule. In hedges for maxim of quality, the function of the hedges for maxim of quality is to indicate that what we are saying may not be totally accurate. Then, the function of hedges for maxim of quantity is to give the right amount of information. Furthermore, the functions of hedges for maxim of relation is to mark that the speaker is going to add an irrelevant information or to stop the conversation. Meanwhile, the function of hedges for maxim of manner is to show respect or politeness.

Moreover, the researcher also analyzes the implied meanings of the hedges that occur in the *Twilight* based on Stalnaker's theory that defines that the utterance always carries its meaning depend on the context it stands for. Furthermore, the implied meaning means that the meaning is delivered beyond what is said. In this research, after watching, reading, and analyzing the data taken from *Twilight* movie, the researcher found out that the implied meanings mostly are about the feeling of happiness, faith, fear, and also about convincing, respecting, rejecting, and teasing allusion.

5.2 Suggestion

This following suggestions hopefully can improve the next research dealing with the hedges:

1. The researcher hopes the other students who have interest in conducting the research about hedges can analyze another object to widen the knowledge about hedges.
2. The researcher also hopes that this research can be useful for students who needs the reference for the next research dealing with hedges.
3. The researcher also expects the other researchers who want to conduct the research in pragmatics field to choose another theory of hedges in order to enrich the knowledge.
4. The students should understand and learn more about pragmatics, especially hedges, in order to make the next research better than the previous research.
