Faculty of Humanities. Language and Literature Department. English Study Program, Purwokerto.

Keywords: Register, Ethnographic Factor, Medical Professionals, Grey's Anatomy.

The research entitled *Analysis of Register Used by Medical Professionals in TV Series "Grey's Anatomy" Season 1* aims to find out the meanings of register that is used by medical professionals and analyze the ethnographic factors which influence the register in TV series *Grey's Anatomy* season 1. The researcher used qualitative method to analyze the data. The data of this research are words contain of medical register.

Purposive sampling was applied in this research since the researcher took the registers from seven out of nine episodes. To analyze the data, the researcher used sociolinguistics approach and two theories. First, register theory was used to find the medical registers. Second, ethnographic factor theory was used to analyze how it influences the registers.

The result shows that there are 26 medical registers, and nine of them are special registers. Special registers are registers that belong to the medical field and it does not have literal meaning. All of the registers that uttered are influenced by the ethnographic factors of the conversation. The ethnographic factors play a big role in influencing the register to be uttered by the medical professionals.

ABSTRAK

Khalilah, Nabilah. 2016. *Analysis of Register Used by Medical Professionals in TV series "Grey's Anatomy" season 1*. Skripsi. Pembimbing 1: Ika Maratus Sholikhah, S.S., M.A., Pembimbing 2: Indriyati Hadiningrum, S.S., M.Pd.. Kementerian Riset, Teknologi, dan Pendidikan Tinggi, Universitas Jenderal Soedirman, Fakultas Ilmu Budaya, Jurusan Sastra Inggris, Purwokerto.

Kata Kunci: Register, Faktor Etnografi, Ahli Medis, Grey's Anatomy.

Penelitian yang berjudul *Analysis of Register Used by Medical Professionals in TV series "Grey's Anatomy" season 1* bertujuan untuk mengetahui definisi register yang digunakan oleh para ahli medis dan menganalisa bagaimana faktor etnografi mempengaruhi register di drama Grey's Anatomy seri pertama. Peneliti menggunakan metode kualitatif untuk menganalisa data. Data dalam penelitian ini merupakan kata-kata yang mengandung register medis.

Teknik sampel bertujuan diterapkan pada penelitian ini karena peneliti hanya mengambil register dari tujuh episode dari total sembilan episode. Dalam penelitian ini, peneliti menggunakan pendekatan sociolinguistik dan dua teori. Pertama, teori register digunakan untuk mengetahui register medis. Kedua, teori faktor etnografi yang digunakan untuk menganalisa bagaimana faktor etnografi mempengaruhi register.

Dalam penelitian ini, ditemukan 26 register medis dan sembilan diantaranya merupakan register spesial. Register spesial merupakan register yang dimiliki oleh profesi medis dan tidak memiliki arti yang sebenarnya. Semua register yang diucapkan telah dipengaruhi oleh faktor ethnography yang melingkupi percakapan. Faktor etnografi mempunyai peran penting dalam mempengaruhi register yang diucapkan oleh para ahli medis.
