

## V. CONCLUSION AND IMPLICATION

### A. Conclusion

1. Roof tiles Craftsmen in Pancasan Village have higher income than Banyumas UMR as much Rp9,982 between roof tiles craftsmen income and Banyumas UMR.
2. The average number of craftsmen income contribution to craftsmen households income of roof tiles industry is 66.16 percent.
3. Craftsmen social-economic condition of roof tiles industry in Ajibarang have been prosperous.
4. The length of work duration, number of family dependants, and education level affect significantly to craftsmen income of roof tiles industry in Ajibarang. Otherwise, age doesn't affect significantly to roof tiles craftsmen income.

### B. Implication

1. Based on analysis result, ajibarang's roof tiles craftsmen have higher income compared with Banyumas UMR, but the difference is very low just as Rp9,982. It's mean, the income is only enough to fulfil primary needs of craftsmen. So, The Government should be take more attention to push economic growht of rooftiles craftsmen in Ajibarang by promotes Pancasan's rooftiles production to another region. Hopefully, it will increasing the demand of Pancasan's rooftiles also raising income and increasing prosperity level of Pancasan's community.

2. Based on the results of the research also known that the average number of raftsmen income contribution to craftsmen households income of rooftiles industry is 66.16 percent. This number is expected to be increase, with the income increase it is also will increasing prosperity of roof tiles craftsmen.
3. Craftsmen social-economic condition of roof tiles industry in Ajibarang have been prosperous. Hopefully, this condition always could be maintained and increase so the community can give help to whom is still in not prosperous category.
4. The craftsmen should be given chance by the company owner to be more innovative of creating rooftiles. Availability of facilities will make craftsmen more skillful in making product. By the example, the craftsmen creates a new model beside of genteng plentong bulat and gepak but creating new innovation like genteng kodok and the craftsmen also can coloring rooftiles to increasing the quality of product.

### **C. Research Limitation**

Limitation in this research is located on the data collecting process, not all the respondent when fill in questionnaire is accompanied by the researcher because of time and energy limit.

Beside that, the respondent is quite a lot, so there is some answer which is not suitable with the researcher expectancy.
