

## RINGKASAN

Penelitian ini bertujuan untuk menganalisis (1) pengaruh fasilitas belajar terhadap hasil belajar siswa kelas XI di SMA Negeri Baturraden; (2) pengaruh minat belajar terhadap terhadap hasil belajar siswa kelas XI di SMA Negeri Baturraden; (3) pengaruh cara belajar terhadap hasil belajar siswa kelas XI di SMA Negeri Baturraden; (4) pengaruh tingkat pendapatan orang tua terhadap hasil belajar siswa kelas XI di SMA Negeri Baturraden.

Penelitian ini merupakan penelitian *ex-post facto* dengan pendekatan kuantitatif. Subyek dalam penelitian ini yaitu siswa kelas XI IPS di SMA Negeri Baturraden yang berjumlah 145 siswa dan 107 siswa dijadikan sebagai responden. Teknik analisis dalam penelitian ini adalah analisis regresi linear berganda.

Hasil penelitian ini adalah: (1) terdapat pengaruh positif antara fasilitas belajar terhadap hasil belajar (2) terdapat pengaruh positif minat belajar terhadap hasil belajar (3) terdapat pengaruh positif cara belajar terhadap hasil belajar (4) terdapat pengaruh positif pendapatan orang tua terhadap hasil belajar.

Implikasi dari penelitian ini, untuk meningkatkan hasil belajar siswa. sekolah perlu pertahankan atau bahkan dimaksimalkan lagi karena fasilitas belajar sangat berkontribusi banyak terhadap kegiatan belajar mengajar dan meningkatkan motivasi belajar agar siswa meningkatkan minat belajar, dan menggunakan cara belajar dengan tepat.

**Kata kunci: Fasilitas, Minat, Cara belajar dan Pendapatan.**

## SUMMARY

*This study aims to analyze (1) the effect of learning facilities on the learning outcomes of class XI students at Baturraden State High School; (2) the effect of learning interest on the learning outcomes of class XI students at Baturraden State High School; (3) the effect of learning on the learning outcomes of class XI students in Baturraden State High School; (4) the influence of parents' income level on the learning outcomes of class XI students at Baturraden State High School.*

*This research is an ex-post facto research with a quantitative approach. The subjects in this study were students of class XI IPS in Baturraden State High School totaling 145 students and 107 students made as respondents. The analysis technique in this study is multiple linear regression analysis.*

*The results of this study are: (1) there is a positive influence between learning facilities and learning outcomes which are indicated by a value of 1.992 and sig 0.000 <0.05; (2) there is a positive influence of learning interest on learning outcomes which is indicated by a value of 1.734 and sig 0.006 <0.05; (3) there is a positive influence on the way learning on learning outcomes is shown with a value of 1.367 and sig 0.007; (4) there is a positive influence of parental income on learning outcomes which is indicated by a value of 0.001 and sig 0.013 <0.05.*

*The implications of this study, to improve student learning outcomes, schools need to maintain or even be maximized again because learning facilities contribute greatly to teaching and learning activities and increase learning motivation so that students increase learning interest, and use learning methods appropriately.*

***Keyword: facilities, interest, learning, and income.***
