

RINGKASAN

Program dana desa diberikan dengan tujuan agar desa dapat meningkatkan pelayanan publik di desa, mengentaskan kemiskinan, mamajukan perekonomian desa, mengatasi kesenjangan pembangunan antar desa, memperkuat masyarakat desa sebagai subjek pembangunan sehingga diharapkan desa dapat menjadi lebih mandiri di dalam mengurus pemerintahan desa. Maka diperlukannya partisipasi masyarakat dan kemampuan pelaksana untuk dapat mengelola dana desa dengan efektif sehingga masyarakat dapat merasakan manfaat dari program dana desa tersebut. Tujuan penelitian ini untuk mengetahui pengaruh yang positif dan signifikan antara pengaruh kemampuan pelaksana dan partisipasi masyarakat terhadap efektivitas pengelolaan dana desa di desa Limpakuwus, Kecamatan Sumbang, Kabupaten Banyumas.

Penelitian dilakukan di Desa Limpakuwus, Kecamatan Sumbang, Kabupaten Banyumas. Sasaran dalam penelitian ini adalah masyarakat Desa Limpakuwus yang berjumlah 98 Orang. metode pendekatannya survey dengan pengumpulan data menggunakan kuisisioner, observasi dan dokumentasi. Teknis analisis data yang digunakan menggunakan Korelasi Kendall Tau, Kendall W dan Regresi Ordinal, Pengolahan data dilakukan dengan menggunakan program SPSS.

Berdasarkan hasil penelitian dapat disimpulkan bahwa terdapat pengaruh yang positif dan signifikan antara kemampuan pelaksana dan partisipasi masyarakat terhadap efektivitas pengelolaan dana desa di Desa Limpakuwus Kecamatan Sumbang Kabupaten Banyumas. Hasil uji regresi ordinal didapatkan pembentukan model persamaan regresi yang digunakan untuk menjelaskan prediksi Kemampuan Pelaksana (X_1) dan Partisipasi Masyarakat (X_2) terhadap Efektivitas Pengelolan Dana Desa (Y) adalah efektivitas pengelolaan dana desa rendah signifikan $Y = \alpha + \beta X$, ($Y = 2,405 + 3,936X$) dan Efektivitas Pengelolaan Dana Desa tinggi signifikansi $Y = \alpha + \beta X$ ($Y = 2,405 + 2,816X$) sehingga variabel Kemampuan Pelaksana dan Partisipasi Masyarakat (signifikan) memiliki pengaruh terhadap variabel Efektivitas Pengelolaan Dana Desa karena nilai pada *parameter estimate* positif.

Kata kunci : Kemampuan Pelaksana, Partisipasi Masyarakat, Efektivitas Pengelolaan Dana Desa

SUMMARY

The village fund program is given with the aim that villages can improve public services in the village, alleviate poverty, promote the village economy, overcome development gaps between villages, strengthen village communities as development subjects so that it is hoped that villages can become more independent in managing village governance. So the need for community participation and the ability of executors to be able to manage village funds effectively so that the community can benefit from the village fund program. The purpose of this study is to determine the positive and significant influence between the effect of implementing ability and community participation on the effectiveness of village fund management in Limpakuwus village. Sumbang District, Banyumas Regency.

The research was conducted in Limpakuwus Village, Sumbang District, Banyumas Regency. The target of this research is the people of Limpakuwus Village, amounting to 98 people. The approach method is survey by collecting data using questionnaires, observation and documentation. The data analysis technique used was Kendall Tau Correlation, Kendall W and Ordinal Regression, Data processing was performed using the SPSS program.

Based on the results of the study, it can be shown that there is a positive and significant influence between the ability of executors and community participation on village fund management in Limpakuwus Village, Sumbang District, Banyumas Regency.. The results of the ordinal regression test obtained the formation of a regression equation model used to explain the predictions of Implementing Ability (X1) and Community Participation (X2) on Village Fund Management Effectiveness (Y), the effectiveness of village fund management is low significant $Y = \alpha + \beta X$, ($Y = 2.405 + 3,936X$) and the Effectiveness of Village Fund Management has high significance $Y = \alpha + \beta X$ ($Y = 2.405 + 2.816X$) so that the Implementing Ability and Community Participation variables (significant) have an influence on the Village Fund Management Effectiveness variable because the value on the estimate parameter is positive.

Key words: Executing Ability, Society Participation, Effectiveness of Village Fund Management
