ABSTRACT

The research aims to: (1) describe the implementation of the inclusive school system at SDIT Harapan Bunda 01 Purwokerto, (2) Analyze instructional communication between teachers and students with ADHD (Attention Deficiency and Hyperactivity Disorders) in inclusive schools through the central method. Using qualitative methods that are case studies. The data collection technique uses the method of observation, interviews and documentation. The analysis technique uses the data analysis by Milles and Huberman, namely in the form of data reduction, data display and verification. Selection of informants using purposive sampling technique. With Tri Asmiati as the informant as the curriculum, Rafela as the inclusion coordinator, Lilis Purwati as the center teacher, Tsani Qonita and Gaza as the ABK student and Mrs. Mustikawati as the parent of the Tsani Qinita student. The research location was conducted at SDIT Harapan Bunda 01 Purwokerto, Jl. KH Wahid Hasyim Gang Pesarean, RT.01 / RW.01, Karangklesem, Banyumas. The results showed that (1) SDIT Harapan Bunda 01 Purwokerto accepts all student conditions, equality of class division and learning curriculum between regular students and students with ADHD (Attention Deficiency And Hiperactivity Disorders), as well as providing shadow teacher services for students with special needs. who require special assistance in undergoing the learning process at school. (2) Instructional communication between teachers and students with ADHD at SDIT Harapan Bunda 01 Purwokerto through the center method occurs in two stages. In the first stage, the center teacher goes through the assistant teacher as stage two until finally it reaches ADHD students through 5 continuum of language quality in the center method.
